Welcome, Mr. Knauer!
By Madeline Blinderman

On Sept. 6, 2016, Harvey’s Convocation celebrated the installation of the new Head of School Mr. Knauer. All of the students sat with their class, and the teachers were dressed in their robes and hoods, with three different colors indicating the degree of study they have attained.

While the Harvey Brass Band played, the faculty entered in order of seniority. As a 40-year faculty member, Mr. Osborne led the faculty and held the Mace. The Pulse was able to talk to Assistant Head of School Richard Wyland, and according to Mr. Wyland, it is called the Barry W. Fenstermacher Mace, symbolizing the academic authority of the Head Of School. In addition, it has the name of the founders of The Harvey School and every headmaster up to and including Mr. Fenstermacher inscribed on it.

The chorus then led the entire Harvey community in singing our national anthem, “The Star Spangled Banner.” Following the national anthem, students sat down with Ms. Lindquist and ask her what her experience was like. “I was asked to write a poem for the Convocation by Mr. Fenstermacher. That got me thinking about beginnings and endings. I spent a lot of time brainstorming and playing with language and words to come up with the poem. I thought that spoken word poetry would fit the event, and I wanted my poem to relate to the teachers and the students because I think students enjoy spoken word poetry. And since this was being heard, I felt the form fit.”

Ms. Lindquist also stated, “It was scary. As our students know, there is fear in public speaking, and nobody had heard my poem before, so I was hoping it would be well received.” Based on the audience’s reaction, it was.

Harvey Builds A Better Future
By Zachary Gault
Contributions by Oliver Little

On Tuesday, Oct. 4, The Harvey School gathered by the student parking lot in anticipation of the fifth annual day of community service, Harvey Builds, which saw students venturing down to different areas of Stamford, Conn. For the second consecutive year, The Harvey School spread its efforts among many different regions of Stamford with the assistance of the East Side Partnership, the Mill River Park Collaborative and Neighbor’s Link. Students were divided into over 25 groups, tackling tasks ranging from painting a mural on the wall of a children’s preschool to planting flower bulbs near playgrounds or cleaning up trash alongside the Mill River.

Years ago, The Harvey School worked with the international nonprofit organization Habitat for Humanity, which seeks to construct or repair houses across the globe for families in need of affordable housing. When asked why the school decided to break away from Habitat for Humanity, Ms. Harris, one of the leading organizers of the event alongside Ms. Normandeau, stated, “We never had any intention of having a long-term commitment to just one area or one organization. We spent two years with Habitat, and then we thought ‘OK, it’s time for a change.’ Then we did one year up here at the reservation, and then all of the opportunities in Stamford came to our attention. We decided to do that for a few years, but maybe next year we might do something entirely different.”

This year, over 10 groups were sent on cleanup patrols as a means to beautify the different areas in and around Stamford. Each group was assigned specific tasks, such as picking up cigarette butts and other waste items along the sidewalk or in the Mill River. When Ms. Kelm was asked how she felt about her group’s contributions, she replied, “It’s nice working with students. Some of them are in my class but others aren’t, so I get to know them a

Dear Editor,

In the past five years, Harvey has built a new gym, a patio and a green room, but I believe it is time for a recording studio. This has been an idea in the back of my mind during the past two years that I have attended The Harvey School.

Harvey is home to many musicians and singers who spend most of their days in the practice rooms, in chorus or in band. There is a limited amount of space to practice throughout the day. Building a space for a recording studio would be great, considering how many musical students we have at Harvey. Not only would it be fun for students to learn how the music industry works, but they could also record a song, edit or use Auto-Tune and produce the music. The room would include digital converters, master clocks, analog hardware, music software, a control surface, keyboard, speakers, instruments and so much more expensive equipment. Students, including myself, who want a career in the music industry would be given this opportunity and would later be thankful for the experience gained during their years at Harvey.

I interviewed Harvey’s music teacher Mislav Forrester and asked him a few questions about his thoughts about a studio on campus. Being so involved in Harvey’s band and music program, he was the perfect person to ask. Mr. Forrester stated, “I think that is a great idea… the biggest issue we have is sound-proofing and getting expensive equipment.” I agreed with him, and we spoke about possibly having multiple fundraisers in order to raise enough money to build it. He also suggested that it be placed in The Walker Center, considering that is where most of Harvey’s art, music and dance classes are based. Because it is a recording studio, it would be mainly available to students who take a class or an elective that have aspects of music in them. Mr. Forrester also stated, “students would have to get permission to use it, but we wouldn’t want to exclude people from the use of it, and obviously if people showed that they were not taking care of it, they would not be allowed back in.”

Harvey needs this studio. Yes, we have a dance studio, and yes, we have an art studio, but what about our fellow musicians? We need a studio for them, too. I myself am willing to do everything and anything to make that happen. Think about it. If Harvey needs this studio. Yes, we have a dance studio, and yes, we have an art studio, but what about our fellow musicians? We need a studio for them, too. I myself am willing to do everything and anything to make that happen. Think about it. If we give students the opportunity a few times a week to practice and guide them to their future goals, we could make stars. One action we could take is to create a GoFundMe made to raise enough money for the necessities needed in building a music studio. Another way is to ask students who know someone in the music industry to donate used studio equipment to us. Instead of having to buy all new items, these donations would be a great way to save money.

This is not a short-term plan. The long-term effect of designing a recording studio in The Walker Center is that for the next decade at Harvey, new students every year who love music as much as I do will have an opportunity that most schools do not provide. Adding another studio in the Arts Center might be another reason for incoming freshmen to choose Harvey as their next decade at Harvey.

Forrester also stated, “students would have to get permission to use it, but we wouldn’t want to exclude people from the use of it, and obviously if people showed that they were not taking care of it, they would not be allowed back in.”

We need a studio for the musicians? We need a studio for them, too. I myself am willing to do everything and anything to make that happen. Think about it. If students, including myself, who want a career in the music industry would be given this opportunity and would later be thankful for the experience gained during their years at Harvey.

Forrester also stated, “students would have to get permission to use it, but we wouldn’t want to exclude people from the use of it, and obviously if people showed that they were not taking care of it, they would not be allowed back in.”

With much appreciation,

Nikkita Johnson

Welcome, Mr. Knauer: cont. from cover.

President of the Parent Association Vivian Levy spoke on behalf of the Parent Association about another century of success. Alum and President of the Alumni Association Daniel Chapman spoke as well, welcoming Mr. Knauer into the Harvey community.

Chair of the Board of Trustees Eileen Walker then spoke about “handing over” a few of Harvey’s many values and traditions, including the gavel, which has been used by the Head of School to introduce school wide meetings and assemblies.

Mr. Knauer then made his first official address as Head of School. He talked about his past in Barcelona, Spain, and he spoke about his goals for the future of Harvey. He especially emphasized the importance of student voice in the Harvey community. The audience was very warm and welcoming about his arrival, and they reacted with enthusiasm to his installation.

The chorus then led the school in the Harvey alma mater, “Amici,” which is Latin for friends. The Pulse was able to talk to senior Lexie Barber, a chorus member of three years. Barber stated, “It was nice that we got to sing the school song in front of Mr. Knauer. It was probably my favorite time the chorus has sung. I was really impressed by how the new choir members were able to learn the song so quickly.”

The Pulse was also able to talk to Mr. Knauer about the day. Mr. Knauer stated, “It was a very important moment for me and my family. We are very honored to be here, and we look forward to being a part of this community.”

To conclude, the Convocation was a great way to start out not only the first day of the new school year, but also many amazing years with Mr. Knauer.
Exploding Samsung Phones
By Kevin Dorf

On Aug. 19, 2016, Samsung released the Galaxy Note 7. Since then, they have recalled millions of them. Samsung said that they have found a problem in the batteries of some of the phones and will stop selling them in 10 countries until they resolve the problem. They will give the customers who had their phones recalled a new phone for free.

The phones have been exploding due to the faulty batteries. According to Forbes, there have been 2.5 million phones sold and 35 have been defective, which is a fairly high number of defective phones considering it is normal to have at most one phone to have problems out of millions of phones. Samsung has recalled its new Galaxy Note 7 smartphone after reports it can overheat and even explode. The company said it had “conducted a thorough investigation and found a battery cell issue.”

There are two cases, both in Florida, where Samsung phones caught fire in people’s cars, setting the whole car on fire. In both instances, the phones were charging in the cars, and the cars caught fire. According to BBC Miami, “Rescue crews have not confirmed if the fire was caused by an exploding phone, but a man in the Tampa Bay area experienced a similar incident when his car caught fire while his Samsung device was charging inside.

On Oct. 5, 2016, a Southwest Airlines flight had to be evacuated after a Samsung phone caught fire on the plane. According to The New York Times, “Southwest said in a statement that passengers and airline employees were taken off Flight 994, which was scheduled to leave for Baltimore, after a customer reported ‘smoke emitting from a Samsung electronic device.’” The phone that caught fire was one of the phones that had been recalled, and they gave the person the new and “fixed” one. As reported by The New York Times, “[passenger] Mr. Green told The Times that he had picked up the new phone on Sept. 21, after the recall. The episode could be damaging for the company, because the replacement devices were thought to be safe.”

The fact that Samsung is still having problem with the phones after the recall is extremely detrimental to the future of the company.

Samsung is having major problems with the Galaxy Note 7, and if they do not fix their phones, they are going to lose dramatically in sales, mainly to their biggest competitor Apple, who released their new iPhone 7 on Sept. 7. The United States Consumer Product Safety Commission chairman, Elliot F. Kaye, encouraged owners of the Samsung smartphone to turn them off and immediately participate in the recall. He also said staff members had reached out to the Federal Aviation Administration, Samsung and Mr. Green, noting that the agency is “moving expeditiously to investigate this incident.”

Exploding Samsung: cont. on page 5.

Exploding Samsung: cont. on page 5. ...
Ms. Kerby Lewis is a new member of the Harvey community. She is the latest nurse who is tasked with keeping our school community healthy. Ms. Lewis has taken over for the beloved nurse Mrs. Puchir, who retired last year after 15 years at Harvey.

Ms. Lewis, who is from New Rochelle, New York in Westchester County, has a wealth of experience when it comes to caring for others. She is one of three children, and she has an older brother and a younger sister.

After high school, she went on to swim in college. She said, “I went to Northeastern University in Boston, and I swam there for two years.” She ended up transferring out of Northeastern and finishing at Iona College in New Rochelle. She added, “I transferred to Iona College, and that is where I graduated, and I earned my B.A. and I swam and played water polo there as well.” Ms. Lewis continued, “I then returned to school and obtained my nursing degree from SUNY Westchester Community College.”

Ms. Lewis wanted to become a nurse when her grandmother became sick. She stated, “I was working for a company doing event planning and public relations, and I found that I was often having to twist the truth to make situations seem better. My grandmother became sick and eventually died. During that time, I was really hands on with her, and I realized that I should probably enter the healthcare field.”

The last job she worked before Harvey was in Norwalk, Conn. Ms. Lewis described, “In my last position, I worked in Norwalk at a hospital working with oncology patients at the Cancer Center. Patients would come in Monday through Friday for their chemo infusions, and I helped care for them during their treatment.”

Outside of school, Ms. Lewis is a very active person who spends her free time outside. She added, “I tend to stay very active. I still enjoy swimming, and I also started running a lot. I ran the New York City Marathon last November. I also like to read memoirs, biographies and books about science.” Ms. Lewis is currently reading the book “Confessions of a School Nurse.”

When The Pulse asked Ms. Lewis about what Harvey students would be surprised to know about her, Ms. Lewis then said, “I swam the Strait of Gibraltar last October. Also, I have a pet fish named Mer-man. Also, her dominant hand happens to be her left hand.

Ms. Lewis currently resides in Stamford, Conn. She said, “I really enjoy the commute to Harvey each morning. It’s beautiful compared to my previous commute, where I would take Interstate-95 to Norwalk Hospital and travel next to trucks.”

Ms. Lewis loves traveling, and last year she went to Spain, Morocco, Colombia and Costa Rica and Bermuda. While in Bermuda she learned how to scuba dive and it is something she plans to continue to learn.

She is a very open minded person who is so excited to join the Harvey community. Even though she is new, she is eager to take in as much as she can of the school and all that it has to offer. She stated, “I am excited to learn about the traditions of The Harvey School.” Ms. Lewis is going to be a great addition to Harvey, and we should all welcome her with open arms.

There are a number of students at Harvey who have been here from grades six to 12, and they are known as the “Harvey Survivors.”

The Pulse interviewed senior Mike Gramando about his seven years at Harvey. Gramando said, “Our grade used to have 19 students, and now it has more than 70.” He also commented that throughout the years, many aspects of the Harvey community have changed, including the new athletic center, fitness center, tennis courts, softball field and the baseball field.

Other seniors who have been here for seven years have seen many changes on this campus. Senior Zach Gault said, “I feel like it has grown in numbers. Also, I believe that the staff always helps students, and that’s what I really enjoy about the school.”

Senior Jake Lewis said, “Harvey has allowed me to grow as a person, and I was able to develop relationships and work better with others.” Both Gault and Lewis highlighted how Harvey teachers help students to blossom and how the school encourages them to engage in different electives and activities.

Pentathlon is an alternate activity for students to earn their sports credit, and Gramando explained, “When I played Pentathlon, it was just a fun time to hang around and be yourself and play Frisbee and go bowling.”

When The Pulse asked the “Harvey Survivors” how it feels to be here for seven years, Lewis said, “It feels odd to think about having been here for seven years. It is comfortable and rewarding to see the school progress as I have been here. So many changes have been made to this campus, and Lewis feels it is rewarding to be a part of these changes.

After seven years, leaving Harvey will be difficult. Gramando stated, “I’ll be happy to graduate high school, but I will be sad. I really like Harvey... I will miss my classmates and my teachers.” The Harvey atmosphere provides the opportunity for its students to grow and make life long relationships with the teachers and fellow students. Gramando also said, “I will miss Mr. Griffin because he is such a passionate person. American history is my favorite history class out of the seven years I’ve been here.”

Lewis said, “My favorite memory is probably is being in Musicology and playing and writing music and being part of such a great team. I don’t really have a bad memory.”

Gault says, “I can’t play favorites because I’ve had great relationships with all my teachers. They have helped me so much academically that choosing one would be too difficult for me.” For some, Harvey made picking their favorite teachers hard because each teacher will develop a different but special relationship with each student.

Harvey makes it possible for students to love learning and makes them passionate about learning. The “Harvey Survivors” can tell you all about it.
The Purpose of Change
by Dajour Fisher

On Monday, Sept. 19, The Harvey School hosted its first Community Meeting.

The new Community Meetings incorporate more group activities. Students walked after the third slot of the day to the designated spot in the Fenstermacher Athletic Center, where they saw three tables: a table for middle school students, one for 9th and 10th grade students, and one for 11th and 12th graders.

The teachers gave each student a sticky note, and as students entered the gym, they were directed to their assigned area. From there the students had to choose a section with a corresponding component of Harvey’s core values, either Passion for Learning, Respect, Integrity, Dynamic Balance or Excellence. The students then had to go to a station and post a sticky note about why they chose that station.

The Pulse met with Mrs. Mahony, and she was asked how she felt about the new Community Meetings. Mrs. Mahony said, “I feel very positive about it. The idea is to give a lot more people voice in school to make it much more interactive.” Mrs. Mahony touched on the fact that Student Council and many other groups have always needed time to get information out to the whole school, or even just the Upper School, and these new communities allow for that opportunity. Mrs. Mahony stated, “It gives opportunities to kind of get to know each other in ways that we don’t ordinarily.” She recognizes that the middle school is the future of our school, and Harvey needs more involvement with them.

Mrs. Mahony was asked by The Pulse to go more in-depth about our new Lightning Lessons, which aren’t the same as Community Meetings. Lightning Lessons will happen throughout the year, mainly on the last Monday of each month. Lightning Lessons are “quick intense educational moments,” said Mrs. Mahony. Students sign up ahead of time for a lesson taught by a particular teacher who teaches a certain lesson of their choice. Mrs. Mahony said, “You have teachers who are bringing you in to get engaged in something that they’re passionate about.” She also said, “and for students, it’s just a way to get a taste of things that maybe at another point you may want to explore further.”

The Pulse also interviewed one of our own students, 10th-grader Treshawn Felder. Felder Feldrich said, “It’s an experience.” The Pulse asked him if he prefers the old type of meetings instead, and he said, “No, because I like the idea of change.” Felder Feldrich attended Mr. Lazzaro’s first Lightning Lesson on Sept. 26.

The students are the heart of the school, and in order for us to deal with change, the majority has to be on the same page. Freshman Victoria Cartularo was asked how she felt about the new meetings, being that she’s new to the Upper School, and she said, “I like it better than previous years as a middle schooler because it’s more interactive.” Cartularo was also asked how she felt about change, and she replied, “It’s an important aspect of high school.”

The Pulse and the entire student body look forward to attending future Community Meetings and Lightning Lessons.

News from The Harv

Softball Is here to Stay
By Sara Steinberg

The softball field has changed from an idea to a reality. The once-crowded area by the main field now solely exhibits the baseball and soccer field. Work on the softball field has been an ongoing process since the end of August. It is expected to be complete by the start of the spring season, depending on the amount of snow in the winter.

The Pulse interviewed Athletic Director Patrick Kennedy about the upcoming softball field. Mr. Kennedy commented, “We had a donor step up and donate money to spruce up the baseball field.” Unlike other buildings and structures on the Harvey campus, this specific build will not be dedicated to anyone. The donor gave Harvey a generous donation, but decided to do it anonymously.

The original reason for this change was to improve the baseball field. Mr. Kennedy stated, “The whole idea was to be able to have a homerun fence, and with the softball and baseball field that close to one another, we really had to find a spot to put the softball field, and the area behind the Arts Center seemed to be the best spot for it.” It is planned to include dugouts, bleachers and a homerun fence, much like the baseball field.

Formerly, the field was used as an outdoor classroom. It was used for softball practice on occasion, but now it’s the permanent home for softball. Little has been removed to make space for the field, which has made it easier for the overall construction. The infrequent usage of this space has allowed it to be replaced. It has gone from an unknown area to the home of a brand-new field.

The pure convenience of this field is an advantage to both the softball team and their fans. Math teacher and Varsity Softball Coach Jacqueline Kelm said, “When we have away games, our equipment is down at the field, so I have to have the girls bring it up the night before. Now, everything is really going to be right here.”

Additionally, the fans will have no problem going to any of the home games due to the close-ness of the field. Ms. Kelm said, “I think that the new field will generate interest among fans, whether it’s faculty, students or parents. I think everyone will be excited to come to games because there will be a place for them to sit.” Instead of walking down the hill, they can stay up on the hill without breaking a sweat.

Unfortunately, last year the team was not able to practice when baseball had a game and when they had practice. However, Ms. Kelm said, “With this new field, we should be able to have practice everyday.”

The field will be nothing but beneficial for the team for games. Their will be no longer have to coordinate around the baseball team.

The softball team has been looking forward to this installation since the end of the season in May. Ms. Kelm stated, “We found out about it at the end of last season, and the girls were super excited.” The rest of the school, on the other hand, found out recently.

Players and coaches are grateful to have a field of their own. Softball is here to stay.

Controversy Surrounding: cont. from page 3.

The Pulse continued by asking Phillips what kind of president he thinks Hillary Clinton would be if elected, and he said, “I think she would be a soft president that would let other countries and terrorist organizations push us around.”

The Pulse then proceeded to question another Harvey student, junior Jared Peraglia, about his opinions on the upcoming election. Peraglia said, “This election has definitely been entertaining from both sides, but to vote for a man who discriminates against American values, such as our racial and religious differences, is seemingly inappropriate. Besides being unqualified and un-presidential for the most important job in the world, Donald J. Trump is a true entertainer. Not just an entertainer for the American public, but for the entire world.”

Peraglia wasn’t done there. He continued by saying, “His bigotry can be seen by his use of language and actions. His discrimination against people of Mexican and Muslim descent can be seen in Trump’s speeches and interviews.”

Clearly Phillips and Peraglia have some strong opinions on each candidate, and they definitely aren’t the only ones. Citizens of the United States and the world will be watching this election carefully, and that is precisely why this election is so important.
Can Money Buy Championships?

By Kevin Dorf

In the first two weeks of the NFL season, the Giants defense has been a strong force in helping them have a record of 2-1 as of Sept. 25. According to The Washington Post, in this off-season, the Giants spent over $204 million on four defensive players: defensive end Olivier Vernon, defensive tackle Damon Harrison, cornerback Janoris Jenkins and the resigning of defensive end Jason Pierre-Paul.

As of Sept. 25, the Giants’ expenditure has worked out for them as they have a record of two wins and one loss and have put on a couple of spectacular defensive performances. The Giants defense only gave up 32 points through the first two weeks, which is impressive considering some teams allow that many points in one game. According to ESPN, the Giants defense has racked up a total of 138 tackles, 2 sacks, 11 passes deflected and one blocked kick.

The Giants defense has shown how strong and how much of a game changer they can be. The Giants offense has been struggling the first couple of weeks of the season, only scoring just 16 points against the only scoring 20 points in week one. Nevertheless, the Giants offense has been struggling the first couple of weeks of the season, only scoring just 16 points against the Jets.

The New York Jets is another team that spent an amazing amount of money this off-season. According to Sportrac, they spent $149 million on free agents alone and spent $217 million in total. Through the first few games this season, their investments have paid off. As of Sept. 25, they sit in second place in the American Football Conference (AFC) and have a one and two record. Their starting quarterback Ryan Fitzpatrick has been struggling with only three touchdowns and a whopping seven interceptions, six of them in week three against the Kansas City Chiefs. The Jets have been having major problems as of late with their defense and offense. Although the Jets have been struggling, they have a strong defense and offense, and it’s just a matter of time before they play up to their full potential and start winning games.

On the other hand, the New England Patriots have spent a small amount of money, only $143 million this off-season, which is low compared to the Giants and the Jets. Yet, the Patriots’ low spending has not affected them at all. They are still one of the best teams in the NFL, and as of Sept. 24, they are first in the AFC. This success is due to the coaching style of Patriots coach Bill Belichick.

With their four-time Super Bowl winning quarterback Tom Brady suspended, they had to start their backup Jimmy Garoppolo. In the second game of the season, Garoppolo went down with a shoulder injury and wouldn’t be able to play for a while.

In week three, the Patriots were forced to start their third-string quarterback Jacoby Brissett against the Titans, who shut out 27-0. After the game, Jacoby Brissett had X-rays on his hand, showing a torn ligament in his hand. As of Sept. 23, the Patriots starter will be Wide Receiver Julian Edelman. The last time he played quarter back was in high school.

Even though these three teams have different tactics in regard to spending their money, they all have found success.
“Sully,” the latest outing by celebrated director Clint Eastwood, tackles the story of Captain Chesley B. Sullenberger, the pilot who was able to save 155 souls by landing a plane on the Hudson River after the main engines failed after a bird strike. Unlike a lot of Hollywood movies that have been made from Tom Hanks and Aaron Eckhart is spectacular, the film suffers from a rantive and a forced conflict.

Tom Hanks is superb as the title character, portraying the trauma and stress of losing the aftight of a successful water landing. The opening scene captures exactly this moment, jumping right into the action. The audience observes both Sullenberger and First Officer Jeffrey Skiles as cinematographer is stunning.

Unfortunately, a majority of the runtime relies on pulling a story where there isn’t one. Rather than focusing on Sullenberger and his growth as a character or the incident, instead we observe a series of rather hostile trials held by the National Transportation Safety Board, investigating whether or not Sullenberger was at fault during the incident were necessary and valid. The film fails in its portrayal of the N.T.S.B., demonstrating each board member as having their own personal vendetta against the two pilots. In actuality, the investigators were just doing their job, just like Sullenberger was on that fateful day of the water landing.

I don’t mind when an artist takes liberties with another story for dramatic effect, but the problem Eastwood runs into is that it is a bit too much slowly creeps around, each angle is truly a pleasure to watch. The colors of a bleak winter in New York City are captured beautifully through the camera. The climax soon drifts into comedic territory when, after listening to a recording taken from LaGuardia Airport’s control tower which demonstrates that neither of these two co-pilots reacted in their situation. Dr. Elizabetharrowto that seat, and the entire N.T.S.B. nodding their heads in consensus. The problem with this resolution is that we have been spoon fed how heroic Sullenberger was many times, and now that one of these villainous board members suddenly expresses this same notion, it just comes off as confusing and frustrating. This ending is a cheap blow to the audience, one that every payoff one should expect from a plot that doesn’t have much to offer in the first place.

The film’s release date, Sept. 9, should also be recognized. A film about over a hundred people dying in an emergency water landing in the very city where one of the worst attacks on our homeland occurred cannot be a coincidence. Eastwood may be attempting to spread a message of hope to a city that really needs it, and although that message seems to be lost at a faraway glance, it quickly becomes obvious when that point forces itself within the dialogue.

Although Tom Hanks’ acting is exceptional as Sullenberger, there are simply too many unnecessary subplots. Eastwood attempts to fit too many pieces of Sullenberger’s personal vendetta against the two pilots, in actuality, the investigators were just doing their job, just like Sullenberger was on that fateful day of the water landing.

As an Apple fan, what would you do? You may also notice that it is a dustproof, and also has an extra dustproof, and also has an extra waterproof. Not only that, but the iPhone new has two new colors, Jet black and black. Both of these colors are darker than the ones on the previous phones, and the jet black is a glossy color.

Another complaint is that the jet black 2 scratches easily. As an Apple fan, what is the purpose of creating such a beautiful color for an iPhone if you have to then buy a case, spending more money to protect the phone?

In the end, if you are an Apple fan and decide to purchase the iPhone 7, then you may want to take a few minutes to think about two things: If you really need the new features, then the iPhone 7 may be for you. However, if you only want the new model because it looks cooler or has a new feature, then the iPhone 7 may not be the best option for you. It is important to consider your own personal needs and preferences when deciding whether or not to upgrade to the latest iPhone model.

Fenty X PUMA: A New Twist In Fashion

Rihanna is known for her beauty, personality and breaking trends. This fall, Rihanna debuted her Fenty X PUMA collection at New York Fashion Week. In 2014, she was signed as PUMA Women’s creative director and has since then been working hard to create a stylish line that everyone can rock. Rihanna has been off the radar recently, but she has taken the Internet by storm with her fashion. Her collection includes the Faux Fur Slides, the Trainer and her gothic themed clothing line.

The “90s inspired Creepers are a big hit. They are suede with a small platform on the sole. These are available in black and white in a black platform, tan, black and white with a brown platform, and white with a brown platform. The new Faux Fur Slides are also very popular. They feature a special gold top at the top of the sneaks, but the all-black design is comfortable and affordable. But, one of the employees at Foot Locker told me that you should try on a half size smaller than usual. In fact, the smaller size is more popular. In May 2017, Rihanna will be releasing the all-white, all-black and dark green and maroon Creepers.

The most popular item in Rihanna’s Fenty X PUMA collection is the PUMA Faux Fur Slides by Fenty. These slides sold out instantly because they are both stylish and comfortable. Trying to find them in stores was nearly impossible because it is a customer favorite. You can wear them with a stylish outfit or even just to lounge around the house. Even though they are comfortable, they make your outfit look even better. Her shoe line increased PUMA’s popularity and profit over the past few months. Rihanna also makes many people, including myself, would never have even thought about buying shoes from PUMA.

Along with Rihanna being signed to the Fenty X PUMA line as creative director, she has also begun her gothic clothing line. From crop top to coats to dresses, she has been able to model them all during the 2016 New York Fashion Week. Her collection includes clothing for both men and women. Unlike her shoe collection, her new clothing line is 2016 high end price-wise, while her shoe collection is more affordable for most. Her crop tops range from $50 per item, while her booties are $350 per piece. In my opinion, not many people will be able to afford her clothing line, but if you like the gothic style and are able to make it work with your own style, then this collection has its price is perfect for you. The media caught a promotion video of Rihanna rocking some of her collection during the New York Fashion Week, and nobody could stop talking about how amazing she looked.

Everyting Rihanna has launched has been a sensation in a totally different direction from what most people are wearing right now. She veered away from the trend-setting and made her own. Rihanna presents unique apparel into every little she touches and it always pays off. She has been known for her fashion sense, and whether it is an appearance on The Red Carpet, BET Awards or the MTV Video Music Awards, she always dresses to impress.

The Creepers, the Faux Fur Slides, the trainer, and her gothic themed clothing line all put a twist into what fashion is in today’s world. Fashion is and can be whatever you want it to be. Like Rihanna, you decide what you think fashion is and make it your own. A gothic-themed line was not unexpected that people may wonder what she will design next. Rihanna never fails to fulfill her fans expectations.
